## A New Opportunity for OA Publishing in Engineering

IntechOpen is a leading global publisher of Journals and Books within the fields of Science, Technology and Medicine. They are the preferred choice of over 60,000 authors worldwide. Their community of more than 108,500 IntechOpen Authors and Academic Editors was founded for the scientists, by the scientists. Their authors range from Nobel Prize winners to up-and-coming researchers at the cutting edge of scientific discovery.

### What is it about?

Together IntechOpen and Knowledge Unlatched plan to make about **250 Frontlist** books in the field of **Engineering** available Open Access.

The well-known library crowdfunding model of KU will be used to enable the publication of about 85 books per year. That requires the support of libraries and institutions to make these books available Open Access. IntechOpen and Knowledge Unlatched plan to raise a total funding of:

**\$1,230,000 // €1,000,000 // £880,000\* p.a. for 3 years**

The program will include authors from high-quality institutes around the world, from the Fukushima Renewable Energy Institute to Stanford University. We will publish their cutting-edge research in monographs and series editions on topics as broad as artificial intelligence and focused as smartgrids.

### Benefits to libraries

Supporting institutions contribute to making these Engineering frontlist titles available Open Access without any author charges. Additionally, authors from participating institutions contributing to any other IntechOpen book receive a discount depending on the support of the library.
